

'Minimalist Influencer Marketing Analytics Dashboard

Analysis of Influencer Performance and Estimated Sales Impact

Student

Aishveer Kaur

Course

BBA Business Analytics

Registration Number

72410262

Executive Summary

This project evaluates Instagram influencer performance for Minimalist using engagement metrics and modeled sales estimates. Visualizations were created in Power BI to assess campaign effectiveness and guide data-driven influencer selection.

Scope

Five influencers, engagements, followers, and estimated sales

Tools

Power BI for interactive dashboards and visual analytics

Outcome

Actionable insights to optimize influencer spend and selection

EXECUTIVE SUMMARY

CLEAR INSIGHTS. STRATEGIC IMPACT.

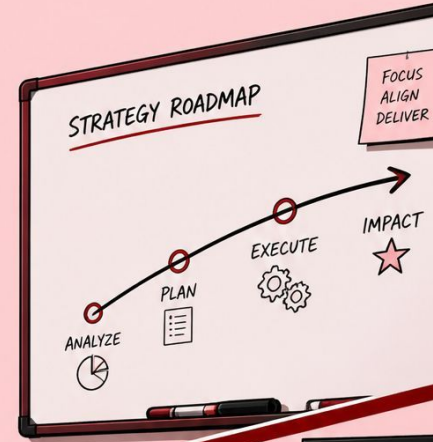

STRATEGIC FOCUS
Prioritizing what drives the greatest value.

MEASURABLE RESULTS
Tracking progress and delivering outcomes.

STAKEHOLDER ALIGNMENT
Collaborating for shared success.

About Minimalist

Minimalist is an Indian skincare brand focused on science-backed formulations, ingredient transparency, and direct-to-consumer digital engagement.

Brand Role of Influencers

- Drive awareness among target demographics
- Showcase product efficacy through authentic content
- Increase social engagement and potential conversions

Project Objectives

Analyze influencer performance

Estimate sales contribution

Generate business insights

Measure audience engagement

Compare influencer effectiveness

Visualize findings in Power BI

Dataset & Methodology

Five Instagram influencers were analyzed using public profile and post-level metrics. Estimated sales were modeled from engagement and assumed conversion rates (actual sales data unavailable).

Influencers

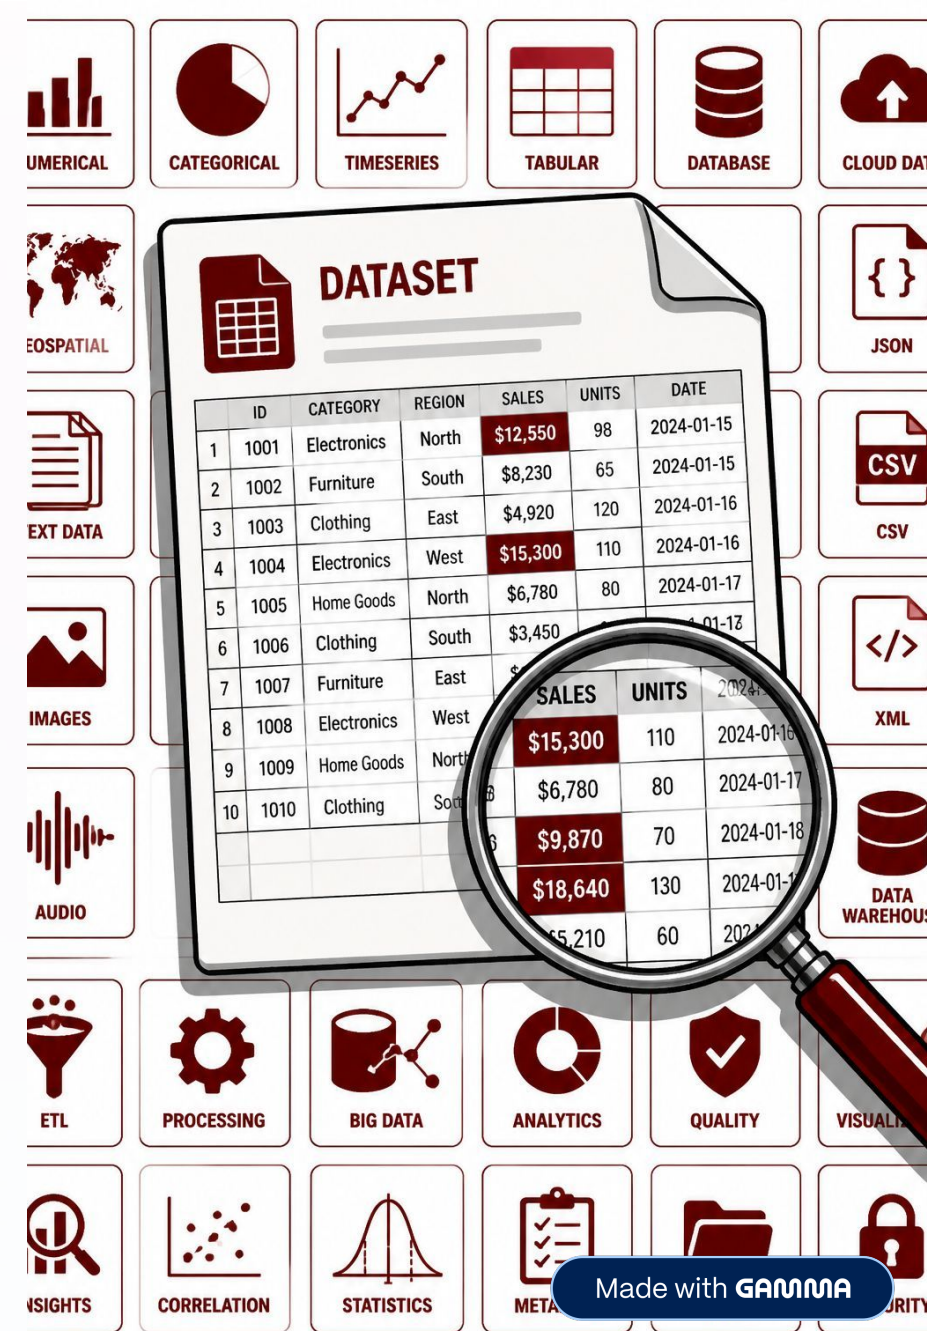

Shreya Jain • Jovita George •
Shweta Vijay • Tarini Shah • Dr.
Aanchal Panth

Key Metrics

Followers, Likes, Comments,
Engagement Rate, Estimated
Sales

Assumptions

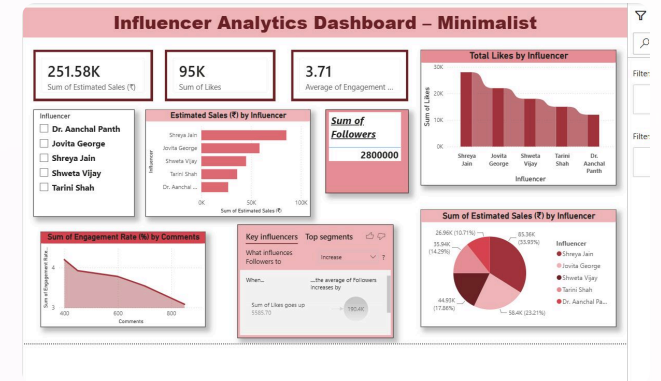

Conversion rates and AOV assumed for sales modeling; documented in methodology notes

Dashboard Overview

Dashboard components:

- Total Estimated Sales
- Total Likes
- Average Engagement Rate
- Total Followers
- Sales Contribution Analysis
- Influencer Performance Analysis

\$ TOTAL REVENUE

\$1.24M

↑ 18.6% vs. last month

NEW CUSTOMERS

842

↑ 14.2% vs. last month

CONVERSION RATE

3.68%

↑ 9.7% vs. last month

AVERAGE ORDER VALUE

\$156.80

↑ 11.3% vs. last month

KPI Analysis

**Total
Estimated
Sales**

₹251.58K

Total Likes

95K

**Average
Engagement
Rate**

3.71%

Total Followers

2.8M

Interpretation: The campaign shows solid reach and a healthy engagement rate for health & beauty content. Modeled sales indicate measurable but modest direct conversions — ideal for optimizing influencer mix.

Influencer Performance Analysis

Placeholder for bar charts (Estimated Sales by influencer, Engagement by influencer).

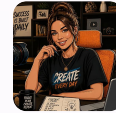

Shreya Jain

Highest estimated sales and strong engagement — primary campaign driver.

Jovita George

High follower count with moderate engagement; good reach amplifier.

Shweta Vijay

Consistent engagement; reliable niche audience.

Tarini Shah

Solid micro-influencer performance; high comment-to-like ratio.

Dr. Aanchal Panth

Credibility and authority yield quality engagement and trust signals.

Sales Contribution Analysis

Placeholder for pie chart showing influencer-wise share of total estimated sales. Identify top performer and relative contributions.

Key Insight

Shreya Jain accounts for the largest share of estimated sales — prioritize for similar future activations. Remaining influencers contribute meaningful support through reach and niche engagement.

Engagement Analysis

Placeholder for engagement visuals (scatter or stacked bars) that compare likes, comments, and engagement rate.

Comments vs Likes

Comments indicate conversational interest; a higher comments-to-likes ratio signals stronger audience intent.

Engagement Quality

Quality interactions (questions, testimonials) are more predictive of conversions than passive likes.

Recommendation

Favor influencers with high-quality engagement for product launches; use broad-reach creators for awareness pulses.
